The Redbud II is a thoughtfully designed Element Series home featuring a flexible two-story layout with 4 bedrooms, 3 baths, and multiple living areas, set on a large homesite with a generously sized backyard in the Star Ranch community. An upgraded 8-foot front door welcomes you inside, where RevWood flooring runs through the main living areas for durability and a cohesive look. The open family room connects naturally to the kitchen and dining area, creating a practical layout for everyday living. The kitchen is finished with quartz countertops, LED lighting, contemporary light fixtures, a large pantry, and ample cabinet space to support daily use and casual gatherings. Oversized windows throughout the home bring in natural light and enhance the open feel. A study enclosed with glass French doors sits near the front of the home, offering a defined workspace. Two secondary bedrooms and a full bath are also located on the first floor, providing flexibility for guests, multi-generational living, or additional home office needs. The primary suite is privately positioned on the main level and includes a deluxe bath with a garden tub, separate shower, and a walk-in closet designed for comfort and function. Upstairs, the layout expands to include a game room, an additional secondary bedroom, and a full bath, creating separation while maintaining usable shared space. Outside, the oversized backyard is enclosed by a 6-foot wood privacy fence, offering room to relax, play, or entertain. Located in Star Ranch in Godley ISD, residents enjoy a peaceful setting with access to greenbelts and common areas, along with easy connectivity to Chisholm Trail Parkway for commuting to Fort Worth and surrounding areas. Visit the Bloomfield Homes model at Star Ranch to learn more about the Redbud II and see how this upcoming home comes together.
