**\$30K in closing cost assistance and rate buydown!** Flooded with natural light and shaped by a layout that feels open from the moment you enter, the Violet III plan by Bloomfield Homes brings 4 bedrooms, 3.5 baths, and a thoughtful mix of private spaces and wide gathering areas to Somerset in Mansfield. The main level is anchored by an upgraded kitchen wrapped in quartz countertops, custom cabinetry, stainless appliances, and a gas cooktop paired with an electric oven. Sightlines extend across the dining and family room, where tall ceilings and large windows create an airy, connected feel. Off the foyer, glass French doors introduce a private study with room for focused work or quiet projects. The first-floor primary suite sits in its own corner of the home and features a dual sink vanity, separate tub and shower, a generous walk-in closet, and modern finishes throughout. Wood-look tile floors add smooth texture to the common areas, while a mud room off the garage keeps everyday comings and goings organized. Upstairs, a bright game room becomes the center point for 3 spacious secondary bedrooms and 2 full baths, each finished with sleek granite counters. Outside, a covered back patio opens to a fenced yard on a calm interior lot, offering a comfortable extension of the living space. The full brick exterior, landscaping package with stone edged flower beds, and striking 8-foot wood front door complete the home with durable style. Blending upgraded materials with Bloomfield's signature design, this Violet III feels balanced, polished, and ready for its first chapter in Somerset.
