Past a facade of dignified brick and stone, an unexpected octagonal foyer greets you in our Hawthorne II floor plan. Hardwood floors lead into a home that feels alive with intention, each space unfolding into the next with ease. There's a study just off the entrance with glass French doors, and beyond that, the space opens up... The ceilings rise above an airy living space where sunbeams pour in through the walls of tall windows. The Deluxe Kitchen showcases white quartz countertops and a deep single-bowl sink set against modern slate-stained shaker cabinets with matte black pulls. A white hexagon tile backsplash glows beneath undercabinet lighting, while a wood vent hood, stainless steel appliances, deep drawers, and a pull-out trash drawer add everyday function. Just off the dining nook, a built-in buffet offers a stylish space for serving or storage. The primary suite rests in a quiet corner of the home, featuring a window seat, spacious layout, and a well-appointed bath with dual vanities, a walk-in shower, and extra cabinet storage in the water closet. Two additional bedrooms downstairs offer comfortable, versatile spaces for guests, hobbies, or home office needs. Tucked away upstairs, a bedroom and full bath accompany the Game Room. Practical perks like blinds already in place, a tankless water heater, an irrigation system, a gas drop on the covered patio, exterior lighting, and our home builder warranty make life easier. This isn't just square footage. It's where routines turn into rituals. Where walls hold stories. Visit Bloomfield's model home to learn how we can help with your dream!
