Say hello to the Primrose VI, a 4,035 square foot dream home that has an impressive open-concept layout and sits on over half an acre! With stone-and-brick curb appeal and two garage bays (for a total of 3 covered spaces), this beauty has 'forever home' written all over it. You're immediately greeted by a wide, welcoming rotunda foyer and glass French doors leading into a Study. 3 bedrooms are tucked away on the main floor (hello, easy living), and 2 more upstairs each come with their own ensuite baths. You've got a media room for movie nights, a game room for friendly competition, and a formal dining room that makes every dinner feel like a special occasion. The family room is bright, open, and cozy, with big windows, vaulted ceilings, and a soaring stone-to-ceiling fireplace that makes the space feel even grander. Right off the Family, the kitchen is built for real life with tons of storage space from upgraded cabinetry, quartz countertops, high-end backsplash, double ovens, and built in range. There's a cozy breakfast nook for a casual dining option, or pull up a barstool to the island! We didn't forget the little details either: a Pinterest-worthy mudroom, sink in the utility room, smart storage, extended covered back patio, and gorgeous wood floors in common areas that give the home a designer touch. So whether you're hosting the holidays or just chilling in PJs on a Tuesday, the Primrose VI is made for real life and all the beautiful chaos that comes with it.
